SAP EDUCATION

SAMPLE QUESTIONS: C_SOA200_70

SAP Certified Associate – Enterprise Architect – <u>print view</u>

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. SAP EAF recommends a variety of approaches for Architecture Change depending on severity. For example, assume that by using the SAP EAF Change Severity Checklist, an Architecture Change has been identified as Complex. What is the recommended approach?

Please choose the correct answer.

a) O Progress via new architecture engagement by following the SAP EAF
      process again.

b) O Progress via normal ITIL Change Management processes.

c) O Progress via Architecture Change Management.

d) O Discuss and agree at next meeting of the Architecture Board.

2. When specifying a composite business process, it is usually recommended to start with the pure business requirements, instead of looking at existing process implementations in any backend application first. This recommended approach is also called the "top down development approach". Which of the following statements is valid for this approach?

Please choose the correct answer.

a) O Enterprise SOA and the SAP Business Process Platform provide the
      necessary flexibility for building composite processes in a top down manner.

b) O The top down approach is not suitable if ERP (Enterprise Resource
      Planning) services are required to setup the process.

c) O The top down development approach is primarily technology driven.

3. You have been given the task of implementing a Process Integration scenario where an external customer sends you a purchase order file in XML format that needs to be converted and into a standard SAP "ORDERS" IDoc. Which statement below is correct regarding this scenario?

Please choose the correct answer.

a) O An "Inbound" File adapter must be configured for the sending system to send
      the file to the XI system.

b) O A "Sender" File adapter must be configured to send the file into the XI
      system.

c) O A "Receiver" File adapter must be configured to receive the file into the XI

system.

d)   O   An "Outbound" File adapter must be configured to receive the file into the XI system.

e)   O   A "Sender" IDoc adapter must be configured for XI to send the IDoc from XI to the SAP Backend system.

4. Which of the following are Core views used in the Business Architecture phase of SAP EAF?

Please choose the correct answer.

a)   O   Value Chain View; Solution Concept View.

b)   O   Conceptual/Logical Entity Relationship View; Data Dissemination View.

c)   O   Service/Information View; Functional Decomposition View.

d)   O   Project Context View; Portfolio View.

5. What is The Open Group Architecture Framework (TOGAF)?

Please choose the correct answer.

a)   O   A proprietary standard, driven by major IT vendors and applicable to all enterprises, which has broad industry acceptance.

b)   O   An open standard, driven by EA practitioners and applicable to large and mid-size enterprises, which has limited industry acceptance.

c)   O   An open standard, driven by EA practitioners and applicable to all enterprises, which has broad industry acceptance.

d)   O   One of the earliest EA Frameworks, a positioning framework for artifacts and a way of categorizing deliverables, which has broad industry acceptance.

6. In TOGAF and SAP EAF, the Information Systems Architecture phase is about defining As-Is and To-Be application and data architectures for the organization. In SAP EAF, which architecture should be defined first?
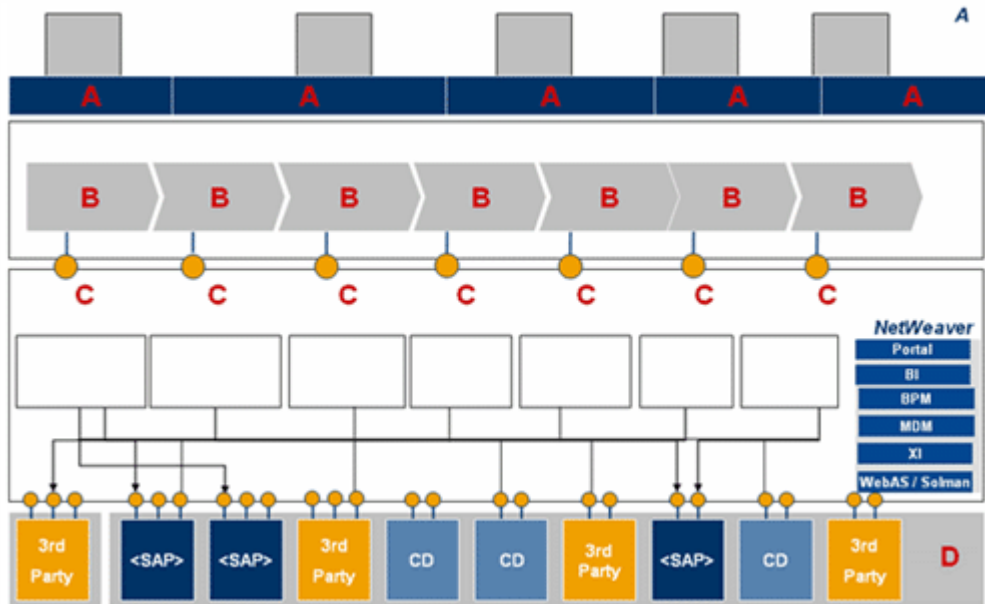

Please choose the correct answer.

a)   O   Data architecture first.

b)   O   Either application or data architecture can be defined first depending on the customer situation.

c)   O   Application architecture first.

d)   O   SAP EAF does not deal with application and data architectures separately.

7. Match the correct terms to the placeholders A,B,C, and D in the following figure.

Please choose the correct answer.

a)   O   A: Stakeholders B: enterprise services C: sub-processes D: applications

b)   O   A: Stakeholders B: sub-processes C: enterprise services D: user-interfaces

c)   O   A: backend B: enterprise services C: sub-processes D: Stakeholders

d)   O   A: Stakeholders B: sub-processes C: enterprise services D: applications

Roadmap – Pulse Check, Architecture and Roadmap_05

8. Which of the following are characteristics of the SAP EAF "As-Is First" process style?

There are two correct answers to this question. Select which of the following answers are correct.

a)   O   An assessment of the current state landscape is used to identify problem areas and improvement opportunities.

b)   O   Suitable when a future state solution is not clearly understood or agreed upon.

c)   O   The target state solution is elaborated in detail and then mapped back to current state, to identify change activity.

d)   O   Suitable when a future state solution is agreed at a high level and where the organization wishes to avoid proliferating current business practice into the "To-Be" model.

9. What are features of the SAP EAF Metamodel?

There are two correct answers to this question. Select which of the following answers are correct.

a)   O   It formalizes the definition of an object and enables understanding of its potential relationships to other objects.

b)   O   It enables support for architecture tooling and interoperability with package and service vendor reference models.

c)   O   It enables extension of the TOGAF Metamodel.

d)   O   It does not provide a specific definition of terms for objects, but leaves this to the interpretation of the user.

10. What does the TOGAF Architecture Development Method (ADM) provide?

There are two correct answers to this question. Select which of the following answers are correct.

a)   O   A number of architectural phases (for example, Architecture Vision, Business Architecture, Information Systems Architecture) in a cycle.

b)   O   Formal and specific definitions of the architecture content structure and deliverables.

c)   O   A narrative of each architecture phase, describing the phase in terms of objectives, approach, inputs, steps and outputs.

d)   O   Guidelines for cross-phase iterations covering Architecture Context, Definition, Transition Planning and Architecture Deployment.
