SAMPLE QUESTIONS: C_TBIT51_71

SAP Certified Technology Associate – Process Integration with SAP Netweaver (PI 7.1)

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. Which of the following model types are available in the Enterprise Services Repository?

There are 3 correct answers to this question. Select which of the following answers are correct.

a)   O   Executable Business Process Model (BPEL Model)

b)   O   SAP Process Component Model

c)   O   SAP Process Component Interaction Model

d)   O   Business Process Modeling Notation Model

e)   O   Enterprise Event-Driven Process Chain (eEPC) Model

2. Which of these PI components are used at DESIGN time?

There are 2 correct answers to this question. Select which of the following answers are correct.

a)   O   The Enterprise Service Repository.

b)   O   The Adapter Engine.

c)   O   The Integration Directory.

d)   O   The SLD.

e)   O   The Mapping Runtime.

3. Integration Processes run on the workflow engine of the SAP NetWeaver AS ABAP. When monitoring a workflow that was started by an Integration Process, which of following could be a valid status for a workflow execution.

There are 3 correct answers to this question. Select which of the following answers are correct.

a)   O   Started

b)   O   Cancelled

c)   O   Error

d)   O   Reprocessed

e)   O   Hold

4. J2EE-based components of SAP NetWeaver Process Integration use the standard logging capabilities of the AS Java. What is the easiest way to configure logging?

Please choose the correct answer.

a)   O   Use the NetWeaver Administrator and navigate to Configuration
               Management -> Infrastructure -> Log Configuration

b)   O   Use transaction SXMB_ADM and maintain configuration parameter
               RUNTIME/LOGGING

c)   O   Use the NetWeaver Administrator and navigate to Availability and
               Performance Management -> Resource Management -> Log Viewer

d)   O   Use the Runtime Workbench and navigate to Configuration; from here you
               can set the monitoring level of the various components

5. You are implementing a Business Activity Monitoring scenario and need to propagate a local event to a global event. What transaction would you use?

Please choose the correct answer.

a)   O   SWF_BAM

b)   O   SWELS

c)   O   SXMB_BAM_ADM

d)   O   EVNT_MANAGER

6. Which of the following are correct statements about local processing (integrated processing) on the Advanced Adapter Engine (AAE)?

There are 2 correct answers to this question. Select which of the following answers are correct.

a)   O   An Integration process

b)   O   The Advanced Adapter Engine

c)   O   An SAP technical component (e.g. technical system)

d)   O   A Configuration Profile

7. End-to-end (E2E) business processes can be designed as combinations of different process types. Which of these f process types can describe such an E2E business process?

There are 3 correct answers to this question. Select which of the following answers are correct:

a)   O   User-centric Composite Processes

b)   O   Core Application or Platform Processes

c)   O   Monitoring Processes

d)   O   System-centric Integration Processes

8. Within SAP NW PI the Enterprise Service Registry (ES Registry) is used as a register for Web Services. What are the features of the ES Registry?

There are 2 correct answers to this question. Select which of the following answers are correct.

a)   O   Provides a classification system for Enterprise Services

b)   O   Is a mandatory component within a SOA landscape

c)   O   Is the environment for the system landscape description

d)   O   Contains entries for all services and service definitions with reference to the services' relevant WSDL metadata and to the locations of callable service endpoints

9. Which of the components below are part of the Advanced Adapter Engine?

There are 3 correct answers to this question. Select which of the following answers are correct.

a)   O   IDOC Adapter

b)   O   Routing and Mapping

c)   O   Module Processor

d)   O   Business Process Engine

10. What are the advantages of the SAP NetWeaver Administrator (NWA) when using it in a PI Environment?

There are 3 correct answers to this question. Select which of the following answers are correct.

a)   O   The NWA is a web based tool for PI administration, monitoring and problem resolution.

b)   O   Since the NWA is web based, no local software installations are required.

c)   O   The NWA is the only tool that allows message monitoring on the ABAP and Java stack.

d)   O   The NWA is part of the Enterprise Service Builder. The usage of the Visual Admin is no longer required.

e)   O   The NWA also provides capabilities for the registration of Enterprise Services.

Solutions

1 a) Correct	**2** a) Correct	**3** a) Correct	**4** a) Correct	**5** a) Correct
1 b) Correct	2 b) Incorrect	3 b) Correct	4 b) Incorrect	5 b) Incorrect
1 c) Correct	2 c) Incorrect	3 c) Correct	4 c) Incorrect	5 c) Incorrect
1 d) Incorrect	2 d) Correct	3 d) Incorrect	4 d) Incorrect	5 d) Incorrect
1 e) Incorrect	2 e) Incorrect	3 e) Incorrect		
6 a) Incorrect	**7** a) Correct	**8** a) Correct	**9** a) Incorrect	**10** a) Correct
6 b) Correct	7 b) Correct	8 b) Incorrect	9 b) Correct	10 b) Correct
